Re: Proposed changes to the method in which indications are included on the ARTG for listed medicines

To whom it may concern:

The NHAA is grateful for the opportunity to provide feedback on the consultation paper 'Permitted (coded) indications for listed medicines' - The proposed changes to the method in which indications are included on the ARTG for listed medicines.

The NHAA supports the new changes provided that the coded indications accurately reflect the traditional and scientific evidence and are continuously updated. The NHAA wishes to ensure that there is continued access to safe, effective and high quality products and that new products are allowed that provide sufficient evidence to make appropriate claims for use.

We thank you for the opportunity to comment on this important issue and look forward to seeing the outcome.

If you have any queries or would like any additional information, please feel free to contact us.

Best wishes,

Leah Hechtman
President, NHAA
